

Kalash Soni

Full-Stack Developer

☎ +91 7400850794 — ✉ kalashsoni20@gmail.com — 🔗 linkedin.com/in/kalashsoni — 🐙 github.com/kalash0001

Professional Summary

Full-Stack Developer with experience in Laravel and Spring Boot, focusing on clean code, scalable applications, REST APIs, and security implementation (JWT/OAuth2). Strong collaboration in agile teams and CI/CD deployment.

Technical Skills

Languages: PHP, Java, JavaScript, SQL, HTML5, CSS3,
Frameworks: Laravel, Spring Boot, Spring Security, Bootstrap
Databases: MySQL, MongoDB
Tools: Git, Postman, Apache, Swagger Maven, Composer
Other: REST APIs, Microservices, JWT/OAuth2, MVC

Professional Experience

Full-Stack Developer

June 2022 – Present

Digiprima Technology, Indore

Remote/On-site

- Developed and maintained web applications using Laravel and Spring Boot for 10,000+ concurrent users.
- Designed REST APIs improving response time by 30% via optimization and caching.
- Implemented JWT auth, role-based access, and protection against web vulnerabilities.
- Built responsive frontends with Vue.js and JS; configured CI/CD with Docker, achieving 99.9% uptime.

Projects

Enterprise Inventory Management System — Laravel, MySQL, Vue.js

2024

- Developed a full-featured inventory management platform with real-time stock tracking, automated reorder alerts, and supplier management.
- Implemented role-based JWT authentication and authorization for secure multi-user access.
- Used Redis caching to improve data retrieval performance by 50% and reduced server load.
- Created responsive dashboards and dynamic Vue.js components for seamless user interaction across devices.
- Optimized SQL queries and database schema, reducing manual inventory errors by 85% and improving operational efficiency by 60%.

SaaS Billing & Subscription Platform — Spring Boot, PostgreSQL, Stripe API

2023

- Built a scalable SaaS billing system with automated invoicing, subscription management, and recurring payment support for 10,000+ users.
- Integrated Stripe API for secure payment processing and implemented webhook-based transaction monitoring.
- Implemented backend microservices with Spring Boot to handle billing logic, notifications, and user subscriptions.
- Set up automated error handling, dunning management for failed payments, and logging for audit compliance.
- Achieved 99.9% transaction reliability and improved billing cycle efficiency with optimized PostgreSQL queries.

E-Commerce API Gateway — Laravel, Redis, Docker

2022

- Architected a centralized API gateway managing product catalog, user authentication, order processing, and analytics endpoints.
- Implemented Redis caching and optimized queries to reduce API response time by 45%.
- Ensured PCI DSS compliance by implementing secure payment flows, rate limiting, and input validation.
- Containerized microservices with Docker and deployed on Nginx, improving scalability and maintainability.
- Designed RESTful endpoints with clear documentation for frontend and third-party integrations.

Education

B.Tech - Computer Science & Engineering

2023 – 2027

Acropolis Institute of Technology & Research, Indore

CGPA: 7.00

Certifications & Additional

Certifications: CCNA, PHP - Procedural & OOP

Contributions: Open-source contributor, technical articles on Laravel

Languages: English, Hindi
