## EDUCATION

### Acropolis Institute of Technology and Research

B.Tech - Computer Science and Engineering

2022 - 2026

CGPA 7.17

### Gaurav Vaibhav Higher Secondary School

2021-2022

Senior Secondary (XII)

80%

### Gaurav Vaibhav Higher Secondary School

2019-2020

Secondary (X)

81%

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript(Basics)

**Frontend:** HTML, CSS

**Backend:** SpringBoot, SpringSecurity, JWT

**Databases:** MySQL

**Developer Tools:** GitHub, IntelliJ Idea, Eclipse, VSCode, Postman

## PROJECTS

### Real-Sync | React.js , Node.js, Express.js ,MongoDB, Socket.io ,Redux-toolkit

2024

- Engineered a real-time chat application with support for instant messaging, notifications, and a user-friendly interface for the application
- Integrated secure user authentication using JWT, ensuring data privacy and protection for over more than registered users, and implemented role-based authorization to manage different user roles.
- Leveraged Socket.io for bi-directional communication, providing seamless real-time updates for individual chats per second.

### VoteSphere | React.js,Node.js, Express.js, MongoDB

2024

- Constructed a secure online voting platform with features for creating, managing, and participating in elections, facilitating over concurrent users and ensuring a smooth and efficient voting process.
- Activated user authentication and role-based access control to restrict voting rights for different user roles, ensuring data integrity and transparency across registered voters.
- Implemented RESTful APIs to handle user requests per day and integrated MongoDB for reliable data storage of votes, election results, and user information.

### Elevate-fitness | Node.js, Express.js, React.js, MongoDB, Nodemailer

2024

- Designed a website for Elevate Fitness gym, featuring membership plans,trainer profiles and an interactive booking system, driving a increase in user engagement.
- Integrated Nodemailer to automate email confirmations for over monthly class bookings, improving communication and reducing no-shows .
- Applied MongoDB for efficient data management of user profiles and membership records, ensuring fast retrieval times and seamless performance.

## TRAINING EXPERIENCE

- Gained hands-on experience in MongoDB, Express.js, React.js, and Node.js, covering authentication, and state management using Redux.
- Developed a real-time web application, implementing RESTful APIs, JWT authentication, and responsive UI using Tailwind CSS

## ACHIEVEMENTS & EXTRACURRICULARS

- Secured a ELITE Rank in the Computer Networks and Internet Protocol NPTEL examination, earning an elite certification and cash reward for scoring 72%
- Certified Postman API Expert on successfully completed the Postman API certification, demonstrating advanced proficiency in creating, testing, and managing 100+ APIs with best practices in API design and development.
- Coding Competition, TeachQuest (AITR College) on Achieving 1st rank in the prestigious TeachQuest coding competition ,algorithmic knowledge and competitive programming skills.
- Demonstrated strong algorithmic and data structure proficiency by solving over 150+ problems on LeetCode.
